Summary

Junior Full Stack Developer with a strong Computer Science foundation and hands-on experience building responsive web applications using React.js, Next.js, and Firebase. Skilled in developing clean user interfaces, implementing application logic, integrating APIs, and managing real-time data. Background in software and game development brings strong problem-solving ability, system thinking, and debugging skills. Seeking an entry-level web or full stack role to contribute to scalable, user-focused products.

Technical Skills

- **Frontend:** React.js, Next.js, HTML5, CSS3, JavaScript, Responsive Design
- **Backend & Services:** Firebase (Authentication, Firestore, Hosting), REST APIs
- **Programming Languages:** JavaScript, C++, C#, Python, Java
- **Tools & Platforms:** Git, GitHub, VS Code, Firebase Console
- **Concepts:** Component-based architecture, State Management, CRUD operations, API integration, Authentication workflows
- **Soft Skills:** Problem solving, collaboration, documentation, adaptability

Experience

Game Programmer

Toasted Studio (Remote)

Aug 2025 – Present

- Built advanced traversal systems (rope swinging, ladder climbing) with physics-driven constraints and a responsive 2D controller handling smooth state transitions.
- Implemented an interaction-based save/load system for checkpoints, serializing player data and progression.
- Unified and optimized core gameplay mechanics, improving collision, physics, and overall feel for a polished Limbo-style experience.

Unreal Game Developer Intern

Fabwelt Studios (Remote)

Aug 2023 – Sep 2023

- Prototyped blockchain-integrated gameplay by connecting NFT ownership to in-game assets using UE5 and Web3 libraries Implemented core mechanics and interactive elements; contributed to replication and
- performance tuning
- Coordinated with artists and backend engineers to link UI flows with blockchain services

Projects

Task Management Web App with AI Assistant

Next.js, React, Firebase, API Integration

- Built a full-stack task management application using Next.js with modern routing and component-based architecture.
- Implemented Firebase Authentication for secure user login and session handling.
- Designed complete CRUD workflows for tasks using Firebase Firestore as a real-time database.
- Integrated an AI assistant feature to assist users with task organization and productivity.
- Focused on clean UI structure, state management, and maintainable code.

Isha Netalya – Static Website

React.js, HTML, CSS, JavaScript

- Designed and developed a responsive static website using React.js for a medical/clinic-based use case.
- Built reusable UI components and structured layouts for clarity and scalability.
- Ensured responsive behavior across devices and browsers.
- Translated functional and design requirements into a working web interface.

First-Person Shooter Game Prototype

Unity, C#, Object-Oriented Programming

- Developed a first-person shooter prototype featuring player movement, shooting mechanics, enemy logic, and HUD systems.
- Applied object-oriented programming principles to structure gameplay systems and interactions.
- Debugged and optimized real-time logic for performance and stability.
- Strengthened understanding of event-driven systems and modular code design.

Education

M.Sc. Computer Science

Ramnarain Ruia Autonomous College, Mumbai

2023 – 2025

GPA: 7.59/10

B.Sc. Computer Science

B.K. Birla Autonomous College, Kalyan

2020 – 2023

GPA: 9.32/10

Certifications & Courses

- Unreal Engine 4 C++ The Ultimate Game Developer Course
- Learn To Create A First-Person Shooter With Unity & C#
- The Complete Python Programming Course: Beginner to Advanced
